

In The Specification:

Please replace the paragraph on page 4, at line 16 with the following amended paragraph:

FIG. 3 depicts a plan view of the non-viewing surface of a corner portion of another embodiment of the invention. Pocket 330 of (e.g. sign) article 300 has an opening 320 and an enclosure defined by unstitched bonds 342. The pocket comprises a pair of substantially parallel bonds (e.g. 342a and 342b) with the opening there between. In the case of pocket ~~[[301]]~~330, the remainder of the perimeter is bonded at unstitched bond 342c. The peripheral edges of the corner sign also include unstitched bonds 340.
